

## **Learning Objectives and Agenda**

Review AIP Model (60 mins)

Gain knowledge of particular ways that children show effects of trauma (60 mins)

List at least three ways to evaluate the readiness of a child for EMDR (60 mins)

Assess dissociative levels of children's regulatory status within the window of tolerance (60 mins)

Learn to apply the 5 item Checklist before proceeding with EMDR Protocol (60 mins)

Learn to use EMDR Protocol with children (120 mins)

**Objective:** Use EMDR protocol with children in a child friendly manner

**Program Description Abstract:** EMDR clinicians need proficiency in EMDR protocol with completion of EMDR Basic Training. Children who experience trauma are able to heal and repair the neurobiology caused by the trauma with assistance from trained EMDR therapists. This workshop will present the EMDR Full Protocol in a child friendly version that will enhance the comfort level of clinicians working with children. Examples of installing calm place, resourcing, and using the adult caregiver will be provided.

**7 CE credits with no additional fees**
